

IRONSTONE
DRILLING SUPPLY

WHOLESALE &
PRIVATE LABEL

China-direct pricing — with the checking already done.

Container-lot drilling consumables for the trade: distributors, drilling-supply houses, regional blenders, and independent mud companies. Sold wholesale in our bags — or packed under your own brand.

WHAT WE DO

01

Source at qualified factories

Licensed, audited manufacturers — verified before the first purchase order.

02

Check every shipment

Certificate of analysis on every batch, pre-shipment inspection, specifications referenced to API 13A / API Spec 7-1.

03

Ship CFR your port

Mixed containers — several products in one box — with documents complete: SDS, and for Canada WHMIS labelling and DSL status.

The split that makes it work: your local supplier keeps the emergency shelf. We carry the planned volume — repeating orders on a six-to-eight-week cycle. Move the predictable tonnage to China-direct pricing without giving up same-day cover.

PRIVATE LABEL

Your brand on the bag, your name on the documents. You choose the products and the bag design; we handle the factory, the specification checks, the inspection, and the freight. Minimums are container-scale, not factory-scale.

HDD & WATER-WELL SUPPLY HOUSES

In HDD and water-well markets, we sell only to the trade — never to your customers. Drilling contractors who contact us directly for these products are referred to a supply house.

CHECK US BEFORE YOU COMMIT

- A line-by-line quote against your current cost sheet — see the difference per product before committing to anything.
- Sample COAs and an inspection report from a comparable shipment.
- Published brand-equivalents with specification proof: ironstonedrilling.com/equivalents
- Indicative FOB pricing, monthly, in the Price Letter. No registration required.
